Chuck Elliott

Foundation course at Bristol (highly commended) 1988
1st class BA (Hons) in Graphic Art, Middlesex University (formerly Hornsey School of Art) 1992

A brief statement

Chuck Elliott's practice is concerned with a fluid investigation of colour, movement and light. Entirely computer generated, free form shapes are cropped, recoloured and enhanced as if editing in a
camera view. Hovering between print making and photography, these pure colour fields retain a clarity that belies the source. The images are produced as Lambda photographic prints.

In recent years I have been commissioned by Mucia Prada, Yohji Yamamoto and Nike, amongst many others.
